

THE BENEFITS OF PREVENTATIVE MAINTENANCE

WHAT?

Preventative Maintenance is the act of regularly inspecting equipment and performing preventative repairs while the equipment is working as expected, to prevent unexpected downtime.

5 ENTRANCE SAVINGS

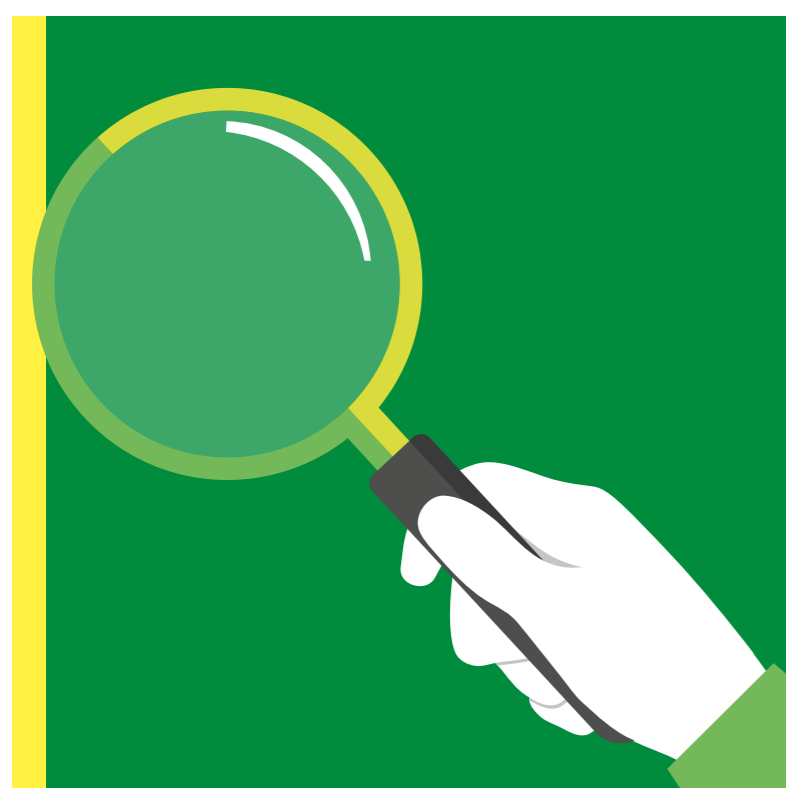

EXTRAS

Predictable annual budget, easy inspections, and discounts on parts and labor

- 1 Reduce number of entrance failures and downtime
- 2 Reduce severity of failures
- 3 Reduce potential security breaches
- 4 Reduce guard supervision costs
- 5 Reduce major repair costs

INSIDE LOOK

Inspection

-  **Mechanical:**
Check condition of gears, moving parts, chains, sliding tracks, etc.
-  **Electrical:**
Check sensors and connections (circuit board, voltmeter)

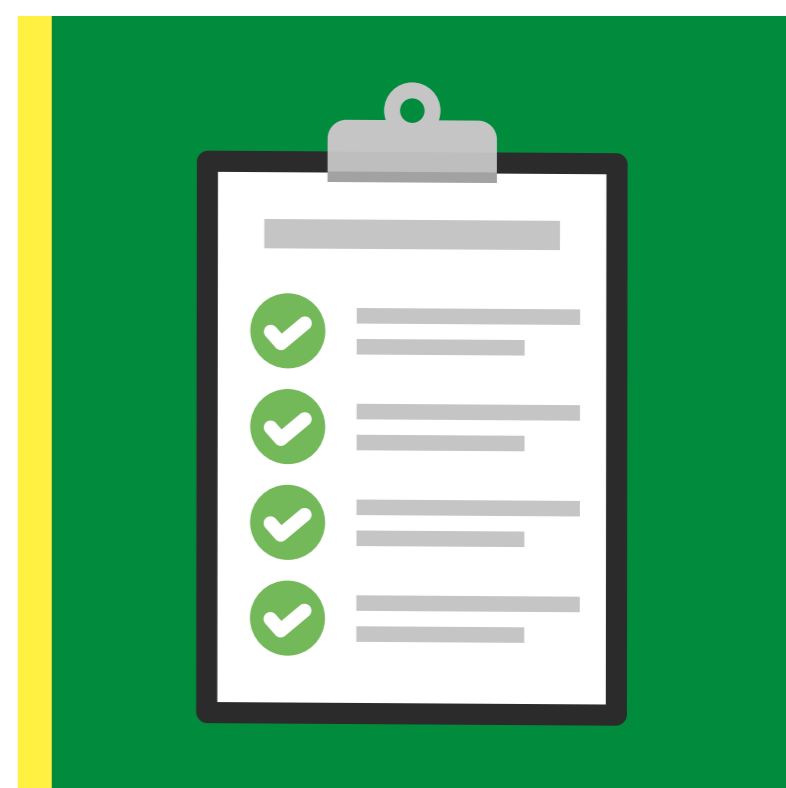

Diagnostics

- Run the entrance through all functions and modes of operation
- Conduct full diagnostics on product software
- Test fire alarm and power loss scenarios for safety
- Test the product's access control integration inputs and outputs

Service

- Clean and lubricate moving parts, track guides, etc.
- Secure and tighten mechanical and electrical connections
- Update software if warranted
- Replace worn parts covered by PM plan
- Calibrate equipment operation as needed
- Clean exterior surfaces

Deliverables

- PM Inspection Report
- Repair recommendations
- Onsite facility training (we'll advise how to get the most out of your entrances!)
